PERFO

S2T GRASS REINFORCEMENT

PERFO

**Interlocking ground reinforcement system
Ideal for farm tracks, gateways, livestock**

- durable, all weather surface which prevents rutting
- can often be compacted into an existing grass surface
- installation onto a granular layer or sub-base also possible
- secure interlocking tiles prevent standing edges
- textured surface for safe grip
- excellent load bearing and weight distribution properties
- can withstand loads of up to 100 tonnes/m² once laid
- grass grows back through the tiles in a short time, preserving the character of the environment
- perforations in tiles maintain natural drainage.
- frost, UV and acid resistant
- planning permission not normally required
- simply compacts into surface - no special skills required
- easy to install yourself in a short time
- tiles can be removed later, if required
- no splintering or risk of injury
- low cost when compared to alternative options

**Easy to install in
3 simple steps**

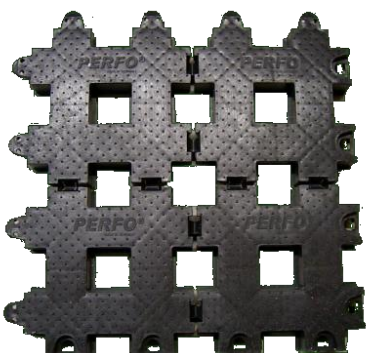

**Transforms soft ground
into a stable base**

**Grass grows back
through the tiles**
