PERFO

S2T GRASS REINFORCEMENT

PERFO

Interlocking ground reinforcement system Ideal for tracks, parking and activity areas

- durable, all weather surface which prevents rutting
- can be compacted directly into an existing grass surface
- installation onto a granular layer or sub-base possible
- secure interlocking tiles prevent standing edges
- self-anchoring tiles with textured surface for better traction
- excellent load bearing and weight distribution properties
- can withstand loads of up to 100 tonnes/m² once laid
- grass grows back through the tiles in a short time, preserving the character of the environment
- perforations in tiles maintain natural drainage.
- frost, UV and acid resistant
- planning permission not required for many applications
- simply compacts into surface - no special skills required
- quick, low cost installation process, compared to alternatives
- tiles can be removed later, if required
- no splintering or risk of injury
- SUDS compliant, environmentally neutral

Easy to install in 3 simple steps

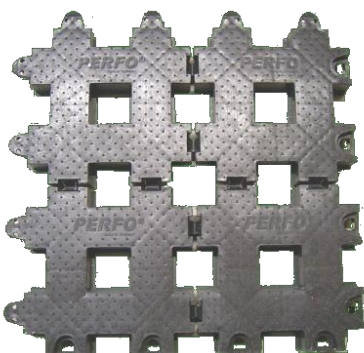

Transforms soft ground
into a stable base

Grass grows back
through the tiles
